

# Travel Kennels

Plastic or wooden containers are acceptable but, most importantly ...

***... all pet travel containers must conform to IATA (International Air Transport Association) Regulations.***

***... we can supply IATA compliant plastic and wooden travel boxes to meet individual requirements.***

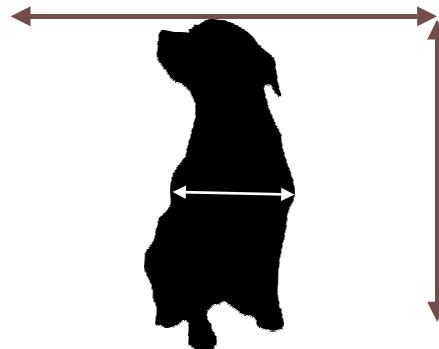

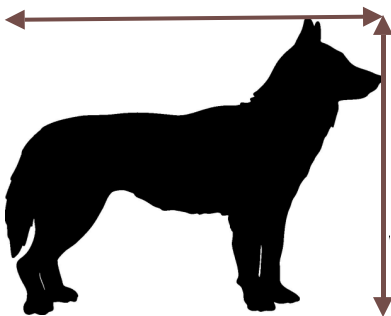

***... if you are supplying your own travel container do not make the mistake of getting one that is not large enough - the right size is vital as the carrier will refuse to carry your pet if the container is too small.***

**Accurately measuring your dog is essential**

## DOGS

If your dog is a breed with erect ears - you must measure to the top of the ear.

Depending upon the breed - your dog could be taller sitting than standing.

**CATS** ... can travel in standard size plastic boxes. Two cats can travel in our specially designed wooden boxes
